

March 20, 2025

Dear Member of Michigan's Congressional Delegation:

As members of Michigan's nonpartisan nonprofit and philanthropic sector, we are deeply concerned by continued efforts to withhold federal funding committed to nonprofits, businesses and government entities. The ongoing uncertainty caused by the federal administration's attempted broad and arbitrary freeze on funding erodes long-standing public/private collaborations that reliably drive Michigan's social and economic vitality.

Our communities are strong when every person feels connected. Our economy is strongest through the full participation of our labor force. These realities cannot be achieved without Michigan's nonprofit sector. Millions of Michiganders rely on nonprofits to support their health, safety, and well-being, especially when challenges arise. By addressing well-documented and data-proven gaps that keep people from fully participating in work, school, and every facet of life, nonprofits bring communities together to ensure that every person has a fair shot at reaching their fullest potential. This is necessary for stable communities, regional growth and a strong economy.

During a time when more than 40% of households in Michigan struggle with the costs of the basics, the charitable sector's role in driving job creation and economic growth is indispensable and unmatched. According to the most recent analysis, nonprofit activities indirectly generate an additional 240,000 jobs in the Michigan economy and generate over \$130 billion in economic activity. Given these statistics, we leverage well over \$100 in economic value for every federal taxpayer dollar invested into the charitable sector. This impact touches every corner of the state — at least 60% of nonprofits in every Congressional district wield public funds to make essential services available to residents.

The administration's attempts to withhold disbursement of dollars already committed by the federal government have already led to disruptions in the lives of working families in Michigan. We strongly oppose such broad and arbitrary actions that, without due process, contradict acts of Congress and upend the lives of everyday households in every Congressional district.

We understand these are challenging times for many. As a collective group, we remain resolute in sharing timely information and in our commitment to advancing policies that strengthen our state through its charitable sector. We advocate as a backbone of the stability and well-being of every Michigander, not a special interest.

As a member of Michigan's Congressional delegation, we urge you to protect the constituents you serve by utilizing your constitutional authority to stand against the administration's active deconstruction of services upon which your constituents rely. We also encourage you to draw on the expertise of your state's nonprofit sector to develop a federal budget that meets the well-established needs of the diverse communities you serve.

Sincerely,

Michigan Organizations:
